#### STATEMENT OF PURPOSE

SOCIAL STATISTICS FOR METROPOLITAN NEW YORK is a series which will publish statistics of the New York region that may be of general interest and utility. It will be sent to interested professional workers who request it.

It is published by interested social scientists from  
The School of Social Work, Columbia University  
The Department of Sociology and Anthropology,  
Fordham University  
The Graduate School of Social Work, New York University

Members of the Publication Committee are

James A. Jones, New York University  
Nathan Kantrowitz, Columbia University  
John M. Martin, Fordham University

Correspondence may be addressed to

Social Statistics For Metropolitan New York  
Graduate School of Social Work  
New York University  
3 Washington Square North  
New York, New York 10003

## FOREWORD

The increasing complexity of urban areas is becoming a common phenomenon of modern life in all parts of the world. It has been a phenomenon of the United States and particularly of the New York area for a long time. This complexity is a character of the social organization which permits the achievements of modern life; it is also a consequence of those achievements. In either case it creates a challenging situation. Coordination must be maintained; complicated planning must be executed; order must be secured; and the complexities of the system must be directed toward the objective which man seeks in them, namely: his freedom and development in the modern city. If they are to be carried out effectively, these activities require creative vision, and political and social skill. But fundamentally they require knowledge, precise, accurate and adequate knowledge of the complex urban situation which confronts us.

It is in this context that the demographer becomes the essential companion to the business man, the public official, the educator or social worker, the religious leader, in brief, to anyone who has responsibility to serve the people of the city on the varied levels of their complicated lives. The urban demographer provides us with a precise framework for understanding the characteristics of our city populations. The anatomy of the city consists in part of its framework of streets and buildings and utilities; it also consists of people in terms of their fixed and measurable characteristics such as number, sex, age, education, occupation, etc. Knowledge of demography alone does not provide insight into the experience of the city's people; but it accurately describes a basic dimension in which that experience takes place and without which a knowledge of that experience alone is lacking in a vital perspective.

We can be grateful, therefore, to Nathan Kantrowitz and Donnell M. Pappenfort for the present Fact Book which makes available in ready and usable form the valuable demographic and housing details which are scattered widely throughout the volumes of 1960 census. As a result of their work, we now have immediately at hand for Metropolitan New York the basic data about population and housing, assembled and presented in such a way that the relationships between the major segments of the population, non-white, Puerto Rican and white non-Puerto Rican are immediately evident to us. Furthermore, the data are summarized and presented on many meaningful levels, from that of the entire New York-Northeastern New Jersey Consolidated Area to the level of particular cities such as Bayonne, or Elizabeth or Yonkers, or the five boroughs composing New York City. This permits not only

comparison of the various segments of the population within a particular area; it also permits comparison of one area with another. The convenient presentation of the data makes this possible now for busy and interested persons of many ranks who would not otherwise have had the time nor the skill to ferret the information out of the census reports. It will be particularly helpful at this time when so many people involved in community programs of various types feel the need of this basic information. The fact that the data are five years old is an inevitable limitation. It would be ideal if a federal census could keep us up to date year by year. But it cannot. Meantime, to have a starting point and a reference point in the reliable data of 1960, so conveniently organized and presented, is a rare advantage to men for whom accurate knowledge of populations is essential. Our enjoyment of this rare advantage we owe to the authors of the present Fact Book. It is the second of a new series, Social Statistics for Metropolitan New York, being published by interested social scientists from Columbia, Fordham and New York Universities.

Joseph P. Fitzpatrick  
Professor of Sociology  
Fordham University

## PREFACE

This volume presents 1960 United States Bureau of the Census statistics. It covers for the residents of the New York-Northeastern New Jersey Standard Consolidated Area, the social characteristics of the Nonwhites, Puerto Ricans, and those Whites who are not Puerto Ricans. The data are tabulated separately for every Standard Metropolitan Statistical Area (or SMSA), every county, and every city of 50,000 or more, whether that city is or is not the Central City for a SMSA. The report exhausts virtually all published county material from the 1960 U. S. Census of Population and Housing for the Nonwhite, Puerto Rican and White Non-Puerto Rican populations. It also includes some hitherto unpublished data for areas which had small Puerto Rican or Non-white populations.

The statistics are taken from the U. S. Bureau of the Census, U. S. Censuses of Population and Housing: 1960, Census Tracts, Final Report PHC (1): numbers 67, 91, 104 (parts 1 and 2), 105, 114, and 145. The Puerto Ricans had the least extensive of tabulations, and these determined what comparisons could be made among all three populations. For example, family income statistics were available for all three populations, and are shown in this volume; but occupations were available only for nonwhites and all whites combined, and are omitted from this volume. All data (except male marital status) presented for the Puerto Rican population in the Census Tract volumes (Table P-5, H-4) were abstracted for the nonwhite population, and derived for the white Non-Puerto Rican population. Any of the data in the fact book which the reader does not find printed in one of these Census Tract volumes are derived from the Bureau of the Census Sample Tract Tally Program computer tape 29I.

#### ACKNOWLEDGEMENTS

This report was produced under the auspices of the Columbia University School of Social Work, Mobilization For Youth Research Project, Dr. Richard A. Cloward, Project Director. Mobilization For Youth Research is funded by the National Institute of Mental Health.

The costs of publication were shared by The Research Center, Columbia University School of Social Work; The Department of Sociology and Anthropology, Fordham University; and The Graduate School of Social Work, New York University.

We are able to present some hitherto unpublished data from the U. S. Bureau of the Census Sample Tract Tally Program computer tape 29I, made available by the Tri-State Transportation Committee.

Many persons assisted us in producing this report: among them we would like to thank Leonard Granick, Deputy Director, and Arthur Schiff, Assistant Director, the Mobilization For Youth Research Project; also Percy Brill, Joanne Burnett, Catherine Parry, Diane Contente, and Graham White. Finally, our especial thanks are due Ravindra Patel for, among many things, his meticulous care in supervising the production of the manuscript.

Naturally, any errors are the responsibility of the authors. We would appreciate it if our readers would report to us any that they find.

## THE DATA AND THEIR SOURCES

The users of this volume should be acquainted with the standard "Introduction" published on pages 1-10 of any PHC(1) census tract volume. We also recommend they have available the standard "Introduction" found in any of the state reports of the U. S. Bureau of the Census, U. S. Census of Population: 1960, Volume I, Characteristics of the Population.

The following technical information summarizes our use of Bureau of Census Statistics.

### The Nonwhite, Puerto Rican, and White Non-Puerto Rican Population Categories

The total population of any one geographic unit ranges from fifteen million people in the Consolidated Area, to fifty thousand in White Plains City. Moreover, nonwhites comprise 34.4 percent of the Newark City population, but only 0.3 percent of that of Clifton City. As a convenience in referring to many of these variations, we have included in Table I, the first of our preliminary tables, each geographic area's total population, and its percentage nonwhite and Puerto Rican.

The user may wish to use our statistics of the nonwhite population as an approximation of the Negro population. However, our nonwhite data include "Other Races," such as Chinese, and also nonwhite Puerto Ricans. The contribution of these groups to the total nonwhite population of each area is shown in Table II; for example, Other Races constitute 4.1 percent, and nonwhite Puerto Ricans 1.6 percent of the Consolidated Area's nonwhite population.\*

The nonwhite Puerto Ricans are also included in our statistics of Puerto Rican population. Table III shows they are 3.9 percent of the Consolidated Area's Puerto Rican population. Also

\*Guides to the social characteristics of these groups may be found in the following two reports of the 1960 Census of Population: PC(2)-1C, Nonwhite Population by Race; and PC(2)-1D, Puerto Ricans in the United States.

the Puerto Rican population shown in our tables is restricted to persons either born in Puerto Rico, or persons of native parentage with at least one parent born in Puerto Rico; Table III reveals that 69.9 percent of the Consolidated Area's Puerto Ricans were born in Puerto Rico.

The white Non-Puerto Rican population shown in our tables is the result of two subtractions: first, the nonwhites are subtracted from the total (all races combined) population, leaving the total white population; next, the Puerto Ricans are subtracted from this total white population, leaving a white Non-Puerto Rican population. For example, from the Consolidated Area's 14,759,429 total (all races combined) population we subtract its 1,624,048 nonwhites, leaving a total white population of 13,135,381. From these 13,135,381 whites we next subtract 671,234 Puerto Ricans, leaving our volume's (approximate) 12,464,147 white Non-Puerto Ricans. But in doing this, we have subtracted the 26,368 nonwhite Puerto Ricans twice (once as nonwhites, and second as Puerto Ricans), when they should have been subtracted but once. If we add these 26,368 nonwhite Puerto Ricans back once to our (approximate) 12,464,147 white Non-Puerto Ricans, we correct this double subtraction, and arrive at a "true" white Non-Puerto Rican population of 12,490,515. Table IV shows that the Consolidated Area's "approximate" 12,464,147 is 99.8 percent of the "true" 12,490,515 white Non-Puerto Rican population.

#### Sampling Variation

Census statistics reporting the same characteristic may differ slightly among themselves because of sampling variability. An example of this can be seen in the "total females, 14 years of age and over" of Middlesex County, New Jersey, shown in the PHC (1)-91 Census Tract volume. The complete enumeration total is 149,793 (Table P-2, page 21), while the 25 percent sampling total is 149,950 (Table P-3, page 36). Sampling variance does not affect the data's validity, and we have followed Census Bureau practice of not forcing sample totals to agree with complete enumeration totals.

For consistency, wherever possible we have avoided mixing complete enumeration with sample data for the same subject matter. For example, our data for "Female Marital Status" uses only complete enumeration data, while our "Labor Force" section uses only sample data. However, in some cases we have had to use both

sample and complete enumeration data within the same subject matter. For example, in Middlesex county, New Jersey, complete enumeration data are published for "Marital Status" of all races combined and for nonwhites (PHC(1)-91, Table P-2). But the same data for Puerto Ricans in Middlesex county are available only from the sample data for the Census Bureau Census Tract computer tape 29I. Hence, in Middlesex county, "Marital Status" for both the Total and the nonwhite populations comes from complete enumeration statistics, the Puerto Rican Population comes from sample statistics, and the white Non-Puerto Rican population is obtained by subtracting sample data from complete enumeration data.

#### Additional Notes

For our housing data, such as "Condition and Plumbing," where the total reads "All Housing Units," our Total Population column includes both occupied, as well as vacant housing units. But our columns for nonwhite and Puerto Rican housing units refers only to occupied housing, and our white Non-Puerto Rican population includes these occupied units subtracted from vacant as well as occupied total units. Table V shows that 5.0 percent of the Consolidated Area's housing units were vacant.

Another special characteristic of housing data is noted in PHC(1)-104, part 1, p. 21: data for owner-occupied units in Manhattan are not available, but these data for New York City and the New York SMSA include Manhattan "cooperative" apartments.

Finally, percentages will not always add to our published totals due to rounding errors.

LIST OF PRELIMINARY TABLES

Table		Page
I	The Nonwhite and Puerto Rican Populations as Percentages of Total Population, for Each County and for Each City of 50,000 or More in the New York-Northeastern New Jersey Standard Consolidated Area, 1960	17
II	Other Races and Nonwhite Puerto Rican Populations as Percentages of Total Nonwhite Population, for Each County and for Each City of 50,000 or More in the New York-Northeastern New Jersey Standard Consolidated Area, 1960	18
III	Nonwhite Puerto Ricans, and Persons Born in Puerto Rico as Percentages of Total Puerto Rican Population, for Each County and for Each City of 50,000 or More in the New York-Northeastern New Jersey Standard Consolidated Area, 1960	19
IV	"Approximate" White Non-Puerto Ricans as a Percent of "True" White Non-Puerto Rican Population, for Each County and for Each City of 50,000 or More in the New York-Northeastern New Jersey Standard Consolidated Area, 1960	20
V	Vacant Housing Units as a Percent of Total Housing Units, for Each County and for Each City of 50,000 or More in the New York-Northeastern New Jersey Standard Consolidated Area, 1960	21
